

INTERNSHIP IN CLINICAL NEUROPSYCHOLOGY

The Psychology Internship Program at Montefiore Medical Center (MMC) is excited to announce the addition of a Neuropsychology Specialization track to our APA accredited program thereby increasing the number of psychology intern positions from 8 to 9.

The Neuropsychology Specialization is suited for interns interested in working with a heterogeneous group of individuals across the lifespan with a variety of medical/neurological/psychiatric conditions, including Alzheimer's disease and other dementias, mild cognitive impairment, stroke, traumatic brain injury/concussion, Parkinson's disease and other movement disorders, multiple sclerosis, epilepsy, anoxic brain injury, HIV-associated neurocognitive disorder, systemic lupus erythematosus (SLE), sickle cell disease, brain tumors and other types of cancers/treatments associated with cognitive changes (e.g., leukemia and breast cancer treatments), ruptured aneurysms/arteriovenous malformations, attention-deficit/hyperactivity disorder, and specific learning disorders.

The Internship in Clinical Neuropsychology at MMC includes didactic and practicum experiences that are consistent with the Policy Statement of the Houston Conference on Specialty Education and Training in Clinical Neuropsychology.

Interns in the Neuropsychology Specialization will be responsible for all phases of outpatient neuropsychological care, including conducting intake interviews, administering, scoring, and interpreting neuropsychological test batteries, report writing, and conducting feedback sessions. Our patient population diverse range of children (ages five and up), adolescents, adults, and older adults. Interns also have the opportunity to supervise junior trainees.

The Neuropsychology Specialization track's core rotations include the Neuropsychology Assessment Service (full year, two cases/week) and research (minimum of 139 hours, equivalent of 1 day/week x 4 months). Interns in the Neuropsychological Specialization will also complete other electives within the Psychology Internship Training Program (1 day/week x 12 months).

In addition to our general psychology curriculum, interns will participate in a weekly neuropsychology didactic series with neuropsychology faculty, fellows, and externs. The series includes various topics, including but not limited to the foundations of cognition, complex differential diagnosis, journal clubs, and case conferences. Interns also have the opportunity to go to neurology and psychiatry grand rounds as well as participate in hospital-wide didactics.

In addition to the current stipend of \$47,752.80, interns receive full medical and dental benefits with a range of choices, as well as 20 vacation days, 12 sick days, 8 hospital holidays, and up to 5 conference days. Interns also receive up to \$2000 in conference support (if presenting), and a \$500 educational allowance that can be used toward textbooks, membership dues, software, PDAs, iPads, e-readers, etc.
