

**Weill Cornell  
Medicine**

**DEPARTMENT OF NEUROLOGY**  
**WEILL CORNELL NEUROPSYCHOLOGY SERVICE**  
428 EAST 72<sup>ND</sup> STREET, NYC

## **Clinical Neuropsychology Externship**

Weill Cornell Medicine providers play a proud part of Weill Cornell's 100-year-old tradition of excellence in academic medicine as academic leaders responsible for many health-restoring medical breakthroughs and advances, as well as scientists active in nationally recognized medical research, on the leading edge of beneficial new procedures and technologies. Committed to delivering outstanding patient care with compassion and concern for each patient, Weill Cornell Medicine physicians are providers of primary and specialty care to people from all five New York City boroughs, the metropolitan area, from across the United States, and from around the world.

**The Weill Cornell Neuropsychology Service** is an outpatient program of the Department of Neurology, Division of Neurodegenerative Disorders. We are highly experienced in the evaluation of patients with a wide variety of neurologic disorders affecting cognition. Neuropsychological evaluations can be useful following a concussion, serious brain trauma, stroke, or other neurologic injuries, or when there is a suspicion of a neurodegenerative disorder such as Alzheimer's disease or another type of dementia. This is a particular good site for trainees interested in age related disorders and dementia.

Externs spend two days (16 hours) involved in direct patient care, supervision, integrative report writing, feedbacks sessions and didactics. Didactics include Neuropsychology lectures, fact finding, and journal club, as well as Neurology Grand Rounds, Memory and Movement Disorders Case Conferences, Brain Health Imaging Initiative Consensus Conferences, Psychiatry Grand Rounds, and a host of other activities available throughout the medical center. There is both group and one-on-one supervision. During the 2022-2023 training year, we are offering a hybrid model that includes in-person training and remote neuropsychological assessments, and we may offer this for 2023-2024.

Interested students should send their application through the NYNJADOT Portal: <https://nynjadot.apa.org/>. See listing for details. Applicants should include a cover letter which explicitly states:

- Potential days you are available
- Experience with neuropsychological measures
- Name and email address of your Director of Clinical Training
