

## PEDIATRIC NEUROPSYCHOLOGY POST-DOCTORAL FELLOWSHIP WITHIN THE NEUROPSYCHOLOGY AND LEARNING SERVICE | 2021-2023

### **POSITION**

Two-year Pediatric Neuropsychology Fellowship with the Neuropsychology and Learning Service

### **REPORTS TO**

Daniela Montalto, PhD

In addition to Dr. Montalto, the postdoctoral fellows have the opportunity to be supervised by a designated faculty on the NLS Team based on rotation:

Meghan Jorgenson, PsyD

Alanna Gold, PhD

Lauren Fiedler, PsyD

### **POSITION SUMMARY**

The Postdoctoral Fellowship in Neuropsychology offered at the Child Study Center, part of Hassenfeld Children's Hospital at NYU Langone, is developed using the Houston Conference guidelines and focuses specifically on assessment and identification of interventions and accommodations for children, adolescents and young adults with neurodevelopmental issues, including learning disabilities, ADHD, and Autism Spectrum Disorder. It also allows for exposure to children and adolescents with a history of medically-related conditions, such as epilepsy, acquired brain injury, and neonatal complications. Fellowship training focuses on a developmental model of assessment, with experiences including clinical work, didactics, and research. Upon completion of the fellowship, trainees will have gained the necessary clinical and research skills for independent practice in pediatric neuropsychology, as well as the knowledge base to pursue board certification in clinical neuropsychology from the American Board of Professional Psychology (ABPP-CN).

Postdoctoral Fellows participate in formal didactics and professional development opportunities. These include attendance at weekly Department of Child and Adolescent Psychiatry grand rounds, Child Study Center (CSC) case conferences, child and adolescent psychology seminars, and seminars at the NYU Langone Comprehensive Epilepsy Center. Fellows will also have opportunities to provide supervision to pre-doctoral trainees and consultation to psychiatry residents, with the support of a faculty supervisor.

Neuropsychology Postdoctoral Fellows also engage in clinical research projects within the department and through collaborations across the medical center. Fellows also have the option to engage in other clinical experiences during their second year, including Organizational Skills Training and Remediation, Parent-Child Interaction Therapy and Family Therapy.

## **DUTIES AND RESPONSIBILITIES**

- Fellows conduct outpatient neuropsychological and educational assessments with children, adolescents, and young adults. All aspects of the assessment process are supervised by licensed staff neuropsychologists.
- Opportunities for follow-up care with patients also exists, with the goal of evaluating neuropsychological status and providing recommendations for interventions, treatment and further assessment.
- Responsibilities also include school consultation and advocacy.
- Fellows will be expected to give presentations at schools and local community organizations. In addition, they serve as consultants to treatment and education services at the Child Study Center.
- Opportunities for scholarly activity are promoted. CSC is a comprehensive child & adolescent mental health center that conducts treatment, research, outreach, & education in the academic Department of Child and Adolescent Psychiatry at NYU Langone Health.

## **QUALIFICATIONS (KNOWLEDGE, SKILLS, AND ABILITY REQUIREMENTS)**

Applicants should have completed all doctoral requirements, including their dissertation, prior to beginning the fellowship. Graduates of APA or CPA accredited doctoral programs and pre-doctoral internships preferred; however qualified candidates with comparable experience in neuropsychology are encouraged to apply and may also be considered. Applicants should have an established foundation in areas related to fellowship experiences, including coursework in developmental/child psychology, neuroscience, neuroanatomy, and neuropsychology, as well as clinically relevant neuropsychological experiences with children and adolescents. Limited Permit is also required at start of fellowship.

## **EXIT CRITERIA FOR FELLOWSHIP INCLUDE**

- Advanced skill in neuropsychological evaluation, treatment, and consultation
- Advanced understanding of brain-behavior relationships
- Scholarly activity (submission of study/literature review for publication/presentation or submission of a grant proposal or outcome assessment)
- Eligibility for state licensure for board certification

## **APPLICATION**

Applications should include a letter of interest, CV, three letters of recommendation, and a clinical work sample (de-identified treatment summary/testing report) and be emailed to [csc-psychtraining@nyumc.org](mailto:csc-psychtraining@nyumc.org). NYU Langone Health is an Equal Opportunity, Affirmative Action Employer. Applications are considered on a rolling basis with a **final deadline of January 4, 2021**. We encourage submission at the earliest possible date. Interviews will be held virtually this year due to COVID-19, and will be scheduled for late January through early February.
