8714 5th Avenue, Brooklyn, NY 11209  
150 55th St, Brooklyn, NY 11220

### **ADULT EXTERNSHIP IN CLINICAL NEUROPSYCHOLOGY**

---

The NYU Langone Health Department of Neurology **Brooklyn campus** is recruiting clinical externs with an interest in neuropsychology for the **2021-2022** training year.

Selected externs will learn to administer, score, and interpret neuropsychological test batteries in adults undergoing inpatient and outpatient work-ups for a wide variety of neurological, general medical, and psychiatric conditions. There may be some opportunity to participate in research activities. Inpatient experiences will take place at the NYU Langone Hospital– Brooklyn located in Sunset Park. Outpatient experiences will be at the NYU Langone Brooklyn Medical Arts Pavilion located in Bay Ridge. The patient population presenting to the Brooklyn campus hospital and outpatient clinic is wide ranging in terms of neurological and psychiatric conditions. Patients are from extremely diverse ethnic, cultural, linguistic, and socioeconomic backgrounds; age range is ~18-90+. Absent a future, unforeseen work-from-home mandate by NYULH associated with the COVID-19 pandemic, trainees should expect that all clinical work and select support and supervision activities will be performed on site.

Externs will attend case conferences and various didactic experiences offered by the NYU Langone Manhattan campus, however, for the foreseeable future, these didactic will remain virtual. If we return to an in-person didactic model, the trip between Brooklyn and Manhattan campuses on the free NYU Langone ferry takes approximately 30 minutes. Supervision of neuropsychology trainees in the adult track on the NYU Langone Brooklyn campus is provided by Alexander Chervinsky, PhD, ABPP.

The year long externship will start at the beginning of **July, 2021** and extend through the end of **June, 2022**. Current enrollment as a doctoral student in Clinical Psychology or related field is required. Graduate coursework in neuropsychology and

prior testing experience are strongly preferred. Trainees are required to commit 2 days per week (16 hours) and are expected to attend at least one weekly Neuropsychology Division didactic (offered on Tuesdays and Thursdays). For additional questions regarding the Brooklyn campus training experience, contact Dr. Chervinsky ([alexander.chervinsky@nyulangone.org](mailto:alexander.chervinsky@nyulangone.org)). For general questions about the various tracks within the NYU Langone Department of Neurology Neuropsychology Training Program, contact Dr. Chris Morrison ([chris.morrison@nyulangone.org](mailto:chris.morrison@nyulangone.org)).

Interested applicants should submit a cover letter and CV (including list of psychological/neuropsychological tests that have been administered) to the APA Externship portal. Two letters of recommendation can be emailed directly to Dr. Morrison from the writer. Be sure to note that you are applying for the **Brooklyn Adult Neuropsychology track**. Applicants may apply to multiple NYU Langone Department of Neurology tracks (Manhattan, Spanish, Combined, and/or Brooklyn campuses; adult and pediatric) simultaneously.

\*This site complies with the PSYDNYS-NYNJADOT Externship Guidelines. Applications will be accepted 1/11/2021-1/19/2021 and the offer process will begin on 3/8/2021. Offers sent from this site after 9am on 3/9/2021 must be responded to within 2 hours. If no response is received to an offer made after that date/time, that offer may no longer be available as it may have been extended to another applicant.

\*\* This is a distinct placement from the NYU Langone Dept. of Neurology **Manhattan only** and the **combined Manhattan/ Brooklyn** adult neuropsychology externship tracks.
