

**WEILL CORNELL MEDICINE NY PRESBYTERIAN –WESTCHESTER BEHAVIORAL HEALTH NEUROPSYCHOLOGY FELLOWSHIP**

The Department of Psychiatry at New York-Presbyterian Hospital (NYPH) Westchester Behavioral Health Center in White Plains, New York is accepting applications for a two-year postdoctoral fellowship position in Clinical Neuropsychology across the lifespan. Affiliated with Weill Cornell Medicine, NYPH offers training in the scientist/clinician model for neuropsychologists who are interested in becoming academic leaders.

The fellowship is designed to provide advanced training in Clinical Neuropsychology following the guidelines of the Houston Conference so as to prepare the fellow to become certified in Clinical Neuropsychology by the American Board of Professional Psychology/American Board of Clinical Neuropsychology (ABPP/ABCN).

Clinical cases primarily involve patients who present with a variety of psychiatric illnesses with accompanying cognitive symptoms and/or comorbid medical illnesses (e.g., dementias, autism spectrum disorders, ADHD, learning disorders, mood disorders, seizure disorders, traumatic brain injury, substance use disorders).

Populations served range in age from early childhood to late life and will include both inpatient and outpatients. Training is based on an apprenticeship model in which the fellows work closely with clinical neuropsychologists. The fellow will also assist in supervising externs in methods of assessment, scoring, interpretation, and report writing. These exams, as well as the fellow's supervision techniques, will be supervised by an attending.

In addition to clinical activities the fellow will devote time to education. A broad range of didactics are offered including neuropsychology case conference, neuropsychology seminar, neuropsychology fellows meeting, psychiatry grand rounds, and specialty psychotherapy seminars. The fellow will also have the opportunity to be paired with a research mentor and if the fellow chooses will have 20% dedicated time to research activities. Areas of research include using cognitive and affective neuroscience techniques (MRI, EEG) to investigate the neurobiology of mood disorders, the development of novel treatment approaches (e.g., transcranial magnetic stimulation, cognitive remediation approaches, behavioral interventions) for psychiatric and/or cognitive symptoms, and cognitive and psychiatric effects of COVID-19.

**Requirements:** Applicants must have a doctorate in psychology, evidence potential to participate in collaborative research, and be able to submit materials required to obtain the limited permit issued by the New York State Department of Education before their start date.

**Application Deadline:** January 5, 2021

**Start Date:** September 2021 (pending limited permit)

**Salary:** Salary is competitive, with full health benefits and vacation package included.

**Application:** Applicants should send current curriculum vitae, two sample reports, and three letters of recommendation, along with a letter of intent describing career goals. Applicants should specify a potential research mentor, if applicable, and their clinical training goals for the fellowship. Applications should be addressed to Beth Rabinovitz, Ph.D., Assistant Professor of Psychology in Clinical Psychiatry and Chaya Fridman Ph.D., ABPP, Director of Neuropsychology in Psychiatry

For further information please contact Beth Rabinovitz, Ph.D. at [bbr9001@med.cornell.edu](mailto:bbr9001@med.cornell.edu)

Please submit applications electronically to: Nina Huza staff assistant [Nih9002@nyp.org](mailto:Nih9002@nyp.org)

**Interviews:** Interviews will be conducted virtually.
